Quick Guide to Creative Commons Licenses for Open Educational Resources (OER)

Applying a Creative Commons (CC) license to your original work changes its copyright status from “All Rights Reserved” to “Some Rights Reserved” (or no rights reserved in the case of CC0). The following chart illustrates the permissions, requirements, and restrictions of the six CC licenses, from the least restrictive to the most restrictive. The first five licenses identify a resource as an OER. If a work has one of the latter two licenses, it may still be used in the ways described in this chart but it is not considered an OER.
